

Dice Rolling System Defense

When a player is defending. They will use two dice. Even if the roll is not successful. As long as they roll a total of six, they will be able to use their default basic defense which is present on their Character Card.

Basic Default Defend for Each Character (If player rolls a minimum of 6 total from 2 dice. If they roll lower than the minimal, the player receives the full amount of the Attack)

CHYNAMAN -15

Kiko the Monkey -10

Shroomy -10

Kat - 15

Bee -10

Queeny -10

Poochi -10

Regardless of - or + on the physical card. The DP number is subtracted from the total number of the Attack if the defense roll was successful.

Retreat is only used if the player has a retreat card. Retreat is used through rolling one dice. Each player has a specific number that they must roll in order for this action to be successful.

For example, Bee Retreat is 3+ so the player must roll a 3 or more in order to have a successful retreat. Once the action is complete the Retreat card will be discarded and a new Action card will be taken up.

Shroomy is 1+

Kat is 1+

Etc.

The lower the number is, the faster the character is.
